

Minutes of Meeting

Topic : Regulation in shrimp farming

Date : March 28, 2021

Time : 15.45 – 18.00 WIB

Location : <https://us02web.zoom.us/>

Attendees :

Budhi Wibowo	Pamudi
Haris Muhtadi	Coco Kokarkin
Harry Juli	Gladis
Bambang Widigdo	Anna Maria
Supito	Retno Nuraini
Pitoyo	

Notes :

Key resume

- FUI will review some regulations that may pose issues on water source use in future
- FUI will provide draft recommendation on regulation related to water source management for Kemenkomar to discuss at national coordination meeting

Detail MoM

- Budhi
 - Some regulation may potentially pose farmers with the issue of water source use in the future
 - PP Cipta Kerja No 27 Tahun 2001 on marine and fisheries sector. One of the article states that there are some license required for the specified seashore construction
 - Article 9 section F states the installation of seawater channel for aquaculture activities require a license
 - May need to specify the requirement and set it as a national regulation
 - If not regulated nationally, the regional government may apply their own desired regulation. E.g., NTB requires retribution of 7% from total investment for the area and water source management license. This may difficult to attract investor
 - Need feedback from FUI member; how much is eligible for such retribution? What requirement needs to take into account?
- Bambang
 - Refer to AMDAL requirement: license applied for big farms with area >50 ha
- Supito
 - May need to take into account specifications as follow:
 - Sourcing area: River or coastal?

- Volume?
- The retribution is tight to production generated? Or maybe to water quality level post-harvest?

Gladys – Kemenkomar representatives

- Need to review the requirement to attract investment
- Agree on license applies on big farms >50 h; less than that does not require permit
- Refer to AMDAL requirement
- Need to push KKP to be more proactive carry out public consultation – finalization – and socialization of new/updated regulations
- Consultation public – important to prevent/ reduce potential conflict among stakeholders
- Perlu mendorong KKP untuk konsultasi public – finalisasi – baru sosialisasi Permen KP

Budhi

- UU Nomor 17 Tahun 2019 - another potential regulation that may posed issue to farmer
- No derivative regulation yet from that UU, no technical reference on that yet

Harry Juli

- Some highlight on UU 17 tahun 2019
 - Article 49 about the use of water resource for business needs; as a medium and as a material.
 - No further description that describes medium and material.
 - Investigator
 - It states that the investigators are carried out by the police and the civil servant from the ESDM ministry.
 - The ESDM team does not have yet any technical instruction guideline on that
 - Article 7 point C
 - This article states to allow the call for interview and to conduct further investigation when there is finding on violation of the law
 - Potential to pose risk as there has not yet any technical instruction guideline describe the regulation

Budhi

- The need to push the government to established derivative regulation of UU no 17 than 2019
 - As stated on the national regulation, ideally the derivative regulation should be released in two years at the latest after UU established
- Need to confirm on the recommendation parameter on ground water use regulation from PUPR – 2 liter per second.
 - Not known who has provided the recommendation
 - Too small
 - Kao bisa ditinggikan lagi

- Need to consider the location of license issuance: local/regional level

Supito

- In terms of the water discharge volume, may need a public consultation with stakeholder to define the level

Harry Juli

- There is a provincial regulation that manages the use of ground water (ppt level required; 3? 5?)
- No need license if it is sourced from river

Bambang

- Restriction on ground water used; international standard
- Type of water
 - Groundwater – not allowed (ppt restriction)
 - Infiltration water - allowed

Coco

- Need to draft recommendation for LBP to bring at national coordination meeting
