Supito	

Notes :

AHPND management

- To progress
 - Nursery system development on small ponds, with HDPE lining
 - The PL 9 can be grown at hatcheries until PL 25 (17 days of nursery)
 - Nursery system managed at hatchery → needs to consider hatchery location, located close to farm area
 - Draft a nursery system development success story
 - Push farmers to have their internal nursery system
 - Success story → Baharudin Aco

Thematic seminar: Designing an effective waste water treatment ponds

- Speaker
 - John Hargreaves: provides practical nitrogen and phosphorus management for intensif farm
 - Itang
 - Supito
- Each speaker will present different topics. Participants are suggested to collect questions in advance for each topic.
